

# BI Converter

Accelerate cross-platform BI migration with a worry-free experience

Enterprises are either choosing or exploring modern BI platforms for innovation and agility. Some are dealing with multiple tools often with overlapping functionality. But high switching costs and business risks prevent organizations from consolidating or modernizing their enterprise platforms once they have rationalized their investments. However, migration from one BI tool to another does not have to be effort intensive, fraught with data issues, and lengthy.

Migration requires an assessment of the current and the target system, rationalization, extraction of the metadata, conversion of reports, and validation. This process can be challenging due to reasons such as a gap in required technical skills and lack of built-in automation tools—thereby requiring manual effort, more time, and higher cost. Specialized tools significantly accelerate this process by automating manual activities and enabling you to focus on what matters for your business.

## BI Converter

BI Converter is an economical and resourceful solution that allows you to seamlessly switch to a BI tool of your choice by automating the major components of the migration cycle from your source to the target system. This allows you to focus on transformation efforts rather than worrying about the foundational elements.

### Features and Benefits

#### End-to-end Migration Toolkit with UI

Better control and ease of use

#### Migration Workflow Automation

Time and cost saving

#### Validation and Optimization of Artefacts

Accuracy and reliability

#### Supports Major Platforms

Wide usability & extensibility

### Why BI Converter?

BI Converter offers an effective strategy for data migration and runs on your existing set up at no additional cost. It reduces the migration cycle by up to 80% and provides up to 70% direct cost savings compared to manual migration. This tool supports IBM Cognos, Oracle Discoverer, and MicroStrategy platforms and is easy to extend.

### Success Story

Performed Oracle Discoverer to MicroStrategy migration for an energy and utilities giant, which unlocked value by reducing development efforts by 40% without altering the upstream data pipeline.

## About Accelerators

InfoCepts brings a suite of accelerators to accelerate, automate and advance your data-driven capabilities. When combined with our cross-functional expertise and solution frameworks, our accelerators dramatically (20-60%) lower time, risk and costs for your D&A initiatives. The accelerators are tangible assets—engineered to solve common problems in a reusable way—that bring our company's nearly 20-year global expertise at your service on Day one.
