

InfoCepts Data Catalogs

A common data vocabulary to improve literacy and trust in enterprise data

The value of your data assets is fundamentally rooted in your users' ability to discover, understand, and trust the data to drive decisions. This involves more than simply giving access to the data with a data dictionary – it requires a creating a common and intuitive language, supported through custom documentation.

InfoCepts Data Catalog solution catalogues your data assets using a proven methodology. Beginning with an assessment and inventory of your assets and ending in a solution roadmap, we use best-fit tools, proprietary accelerators, and knowledge management techniques. We include features such as quality indicators, lineage tracking, search, security, and operational controls to guarantee sustainable access to trustworthy data for your entire community of users.
