

Solution Accelerators

Reusable capabilities to speed the delivery of your solutions

InfoCepts brings a suite of accelerators to accelerate, automate, and advance your data-driven capabilities. When combined with our cross-functional expertise and solution frameworks, our accelerators dramatically (20-60%) lower time, risk, and costs for your D&A initiatives. The accelerators are tangible assets - engineered to solve common problems in a reusable way - that bring our company's 16-year global expertise at your service on Day 1. You benefit from the lessons learnt, best practices and experience from other clients with the flexibility to tailor them for your unique needs. And, we are always co-creating more with our customers. Whether you want to optimize your investments or transform them, we have an "accelerator" for that's \$2.7 M and counting.

Accelerator Catalog

Integration	Automation	Migration	Information
 Real Time Data Streamer (RTDS)	 Analytics Platform Automation Kit (APAK)	 Accelerated Cloud Analytics	 Infocepts Voice Assistant (IVA)
 AcceLake	 Automated Quality Analyzer (AQuA)	 Quick to Cloud (Q2C)	 Cloud Cost Monitor (CCM)
		 BI Converter	

Benefits

-  Shorter time-to-market
-  Faster transformation
-  Lower risks
-  Better quality
-  Lower cost
-  Happier users

Success Stories

- Accelerated migration of a BI platform with 1.1 million objects, 38 TB data to AWS for a luxury retailer, which led to **44% faster time to value** and prevented dozens of security and cost overspend incidents
- Helped a media giant in high- velocity and complexity MicroStrategy object releases with **30% savings in overall efforts**. Centrally managed 1000+ migrations in a quarter involving 1,500 projects, 40+ I-Servers, 100+ admins

Accelerator	What it does	How it helps
RTDS – Real Time Data Streamer A tool to move data from legacy to modern data systems in near real-time	Empowers customers to transition from a “once-a-day batch” to an “all-day stream” mode at scale	Accelerates time-to-insights for business in an efficient, reliable, scalable and cost-effective way
AcceLake Solution for configuration and set up of Data Lake components	End to end solution to shorten the implementation cycle for cloud native Data Lakes	Implement a Data Lake 60% ahead of schedule
APAK - Analytics Platform Automation Kit One-of-its-kind suite of 30+ practical and extensible automations for MicroStrategy	Helps in automating most of the release lifecycle related operations through a single UI	Helps achieve productivity gains, reduced dependencies, faster time to value, and up to 37% TCO savings
AQuA – Automated Quality Analyzer A quality automation tool to validate data quality across its lifecycle	Enables accelerated and accurate scaling of the data quality processes. Configurable to suit unique customer needs	Provides significant cost savings and faster turn-around times over manual QA process. Up to 30-40% reduction in QA efforts
Accelerated Cloud Analytics Automation suite for end-to-end cloud migration	Automates key migration processes for Analytics environments from On-Prem to Cloud	Shortens cloud migrations time from months to days, eliminates risks and reduces skill dependences
Q2C – Quick to Cloud A cloud migration accelerator suite based on open-sourced technologies	Facilitates migration of data from end-of-life data platforms to cloud-native DBaaS offerings like Snowflake and Redshift	Ensures ‘first-time-right’ migrations by automating repeatable steps. Easy and cost effective to extend and customize
BI Converter A tool that automates migration from specific source to target BI platform	Helps organizations accelerate the modernization of their BI stack without vendor lock-in. UI to manage the entire migration lifecycle.	Saves time and cost, reduces dependence on niche skills
IVA – InfoCepts Voice Assistant Knowledge discovery engine with voice-enabled capabilities	Empowers business users to find and use key information while leveraging existing enterprise assets with minimal disruption. Gives user adoption a shot in the arm.	Improves productivity (up to 1.7X), reduces onboarding cycles (up to 2.5 X faster) and sub-second response over TBs of data
Cloud Cost Monitor Cloud spend optimization tool	Provides a single view of costs across multi-cloud environments, and makes AI-powered recommendations	Unified, consolidated view of cloud spend. Highlights potential overspend across cloud platforms

“ The InfoCepts data streamer has become a central part of our IT strategy. It has changed our systems approach from a ‘once-a-day batch’ mentality to ‘all-data-in-real-time’. RTDS fits nicely within our cloud migration plans as well. I would recommend any organization that wants to change their data paradigm to look at RTDS as a key component in their toolbox. ”

- Senior Manager, Analytics

About InfoCepts

InfoCepts is a global leader of end-to-end data & analytics solutions with nearly 20 years’ experience enabling customers to derive value from a variety of data-driven capabilities. Unique amongst its peers, InfoCepts operates with the scale of a global consulting firm, yet the expertise of a niche partner.
