# Solution Accelerators

## Reusable capabilities to speed the delivery of your solutions

InfoCepts brings a suite of accelerators to accelerate, automate, and advance your data-driven capabilities. When combined with our cross-functional expertise and solution frameworks, our accelerators dramatically (20-60%) lower time, risk, and costs for your D&A initiatives. The accelerators are tangible assets - engineered to solve common problems in a reusable way - that bring our company's 16-year global expertise at your service on Day 1. You benefit from the lessons learnt, best practices and experience from other clients with the flexibility to tailor them for your unique needs. And, we are always co-creating more with our customers. Whether you want to optimize your investments or transform them, we have an "accelerator" for that's $2.7 M and counting.

## Accelerator Catalog

### Integration

- Real Time Data Streamer (RTDS)
- AcceLake

### Automation

- Analytics Platform Automation Kit (APAK)
- Automated Quality Analyzer (AQuA)

### Migration

- Accelerated Cloud Analytics
- Quick to Cloud (Q2C)
- BI Converter

### Information

- Infocepts Voice Assistant (IVA)
- Cloud Cost Monitor (CCM)

## Benefits

- Shorter time-to-market
- Faster transformation
- Lower risks
- Better quality
- Lower cost
- Happier users

## Success Stories

- Accelerated migration of a BI platform with 1.1 million objects, 38 TB data to AWS for a luxury retailer, which led to **44% faster time to value** and prevented dozens of security and cost overspend incidents

- Helped a media giant in high- velocity and complexity MicroStrategy object releases with **30% savings in overall efforts.** Centrally managed 1000+ migrations in a quarter involving 1,500 projects, 40+ I-Servers, 100+ admins

| Accelerator | What it does | How it helps |
|---|---|---|
| **RTDS – Real Time Data Streamer**<br>A tool to move data from legacy to modern data systems in near real-time | Empowers customers to transition from a "once-a-day batch" to an "all-day stream" mode at scale | Accelerates time-to-insights for business in an efficient, reliable, scalable and cost-effective way |
| **AcceLake**<br>Solution for configuration and set up of Data Lake components | End to end solution to shorten the implementation cycle for cloud native Data Lakes | Implement a Data Lake 60% ahead of schedule |
| **APAK - Analytics Platform Automation Kit**<br>One-of-its-kind suite of 30+ practical and extensible automations for MicroStrategy | Helps in automating most of the release lifecycle related operations through a single UI | Helps achieve productivity gains, reduced dependencies, faster time to value, and up to 37% TCO savings |
| **AQuA – Automated Quality Analyzer**<br>A quality automation tool to validate data quality across its lifecycle | Enables accelerated and accurate scaling of the data quality processes. Configurable to suit unique customer needs | Provides significant cost savings and faster turn-around times over manual QA process. Up to 30-40% reduction in QA efforts |
| **Accelerated Cloud Analytics**<br>Automation suite for end-to-end cloud migration | Automates key migration processes for Analytics environments from On-Prem to Cloud | Shortens cloud migrations time from months to days, eliminates risks and reduces skill dependences |
| **Q2C – Quick to Cloud**<br>A cloud migration accelerator suite based on open-sourced technologies | Facilitates migration of data from end-of-life data platforms to cloud-native DBaaS offerings like Snowflake and Redshift | Ensures *'first-time-right'* migrations by automating repeatable steps. Easy and cost effective to extend and customize |
| **BI Converter**<br>A tool that automates migration from specific source to target BI platform | Helps organizations accelerate the modernization of their BI stack without vendor lock-in. UI to manage the entire migration lifecycle. | Saves time and cost, reduces dependence on niche skills |
| **IVA – InfoCepts Voice Assistant**<br>Knowledge discovery engine with voice-enabled capabilities | Empowers business users to find and use key information while leveraging existing enterprise assets with minimal disruption. Gives user adoption a shot in the arm. | Improves productivity (up to 1.7X), reduces onboarding cycles (up to 2.5 X faster) and sub-second response over TBs of data |
| **Cloud Cost Monitor**<br>Cloud spend optimization tool | Provides a single view of costs across multi-cloud environments, and makes AI-powered recommendations | Unified, consolidated view of cloud spend. Highlights potential overspend across cloud platforms |

> " The InfoCepts data streamer has become a central part of our IT strategy. It has changed our systems approach from a *'once-a-day batch'* mentality to *'all-data-in-real-time'*. RTDS fits nicely within our cloud migration plans as well. I would recommend any organization that wants to change their data paradigm to look at RTDS as a key component in their toolbox. "
