

# Pharma Use Case Medication Therapy Management

Medication Therapy Management (MTM) is a health care service provided by pharmacists with the aim of optimizing drug therapy and improving therapeutic outcomes for patients. We have developed an MTM app that enables health care providers to achieve this goal by providing key MTM statistics on a single platform.

## Key Performance Indicators

- MTM Patient Summary - Total Patients, Eligible Patients and Enrolled Patients
- Patient Distribution by Gender
- Medication Adherence for MTM and Non-MTM patients
- Drug Therapy Problems – Identified and Resolved for MTM and Non-MTM patients
- Medication Appropriateness

## Users

- Pharmacists
- Physicians
- Healthcare Professionals

## Benefits

- The app provides key MTM statistics that enable pharmacists to make quicker decisions
- It provides a quick snapshot of each patient’s medication adherence history for better drug prescription
- It eliminates the need to spend hours and days to manually collect and analyze data
- It assists health care professionals in effortlessly achieving their MTM goals of optimizing drug therapy and achieving better therapeutic outcome for their patients
- It improves collaboration between pharmacists, physicians and other healthcare professionals

## About InfoCepts

Since 2004, InfoCepts has enabled leading companies like UBS, Nielsen, GE and Bayer to derive value from their data. Recently featured in Gartner’s Market Guide for Data Science and Machine Learning Service Providers, our 750-strong pool of consultants has expertise in 60+ Business Analytics and Information Management technologies. Our BA-IM specific development methodologies and the differentiated expertise of our multi-award winning DV team help us deliver solutions that derive maximum value from enterprise data. Every day over 70,000 users across industries use analytics solutions developed by us to make better decisions.
